

## **ATLANTIC BROADBAND BRINGS GIGABIT INTERNET AND ADVANCED TIVO® ENTERTAINMENT SYSTEM TO DERRY TOWNSHIP, PA**

*Services deliver exceptional online and TV viewing experiences*

**DERRY TOWNSHIP, PA, September 29, 2020** – [Atlantic Broadband](#), the nation’s eighth-largest cable operator, today announced that it has launched superfast Gigabit internet and TiVo’s new Unified Entertainment System in Derry Township in Mifflin County, Pennsylvania.

The launch of Gigabit speed—or 1,000 megabits per second—is occurring at a time when homes and workplaces increasingly require internet with the capacity and performance to power the growing number of devices and applications customers rely on every day, including work from home and distance learning. Gigabit’s high-performance speeds, made possible through robust DOCSIS 3.1 technology, power the most data-intensive applications so that home and business users can surf, stream, download and work online simultaneously.

“Atlantic Broadband is dedicated to providing the latest powerful Gigabit broadband internet to homes and businesses in our service areas,” said Heather McCallion, Vice President of Products & Programming. “We are proud to expand the availability of Gigabit in our communities, enabling them to access speeds that will transform the online experience for businesses and homes.”

The average internet download speed over fixed broadband in the U.S. is about 86 Mbps, according to Ookla’s Q2 2020 [report](#). Gigabit internet delivers speeds more than 10 times faster than traditional offerings.

With the launch of TiVo, customers in Derry Township will have access to a new entertainment platform featuring a modern user interface with intuitive navigation, personalized viewing recommendations and an easy-to-use voice remote to provide fast, highly accurate results of searched-for programs. Content also is searchable across multiple video sources, including live TV, DVR recordings, Video On Demand and streaming apps. The new TiVo Entertainment System also allows customers to access content on multiple screens across TVs, smartphones, tablets and more, both in-home and on-the-go.
