

ATLANTIC BROADBAND PARTNERS WITH STATE IN CONNECTIVITY INITIATIVE TO PROVIDE HIGH-SPEED BROADBAND INTERNET TO SCHOOL FAMILIES

Fast, reliable broadband internet will help support remote learning solutions

New London, CT July 28, 2020 [Atlantic Broadband](#), the nation's eighth-largest cable operator, today announced its participation in a statewide initiative to bring internet connectivity to households in Connecticut with school-aged children to support remote learning solutions.

Through the program, the state will access federal CARES Act funding to obtain internet services and other remote learning tools for students living in households that currently lack connectivity. The Coronavirus Aid, Relief, and Economic Security Act (CARES) was passed by Congress in March to help the public and the business sector to manage through the health and economic impacts of the COVID-19 outbreak.

"We are committed to bringing reliable, high-performance broadband internet to homes that need it most, as work-from-home and online learning has become necessary in the wake of the COVID-19 pandemic," said Juan Dominguez, Vice President of Sales for Atlantic Broadband. "We are pleased to help make this initiative possible and will work closely with state officials and our local school districts to ensure that serviceable households with students currently lacking connectivity will have great internet backed with local customer care and professional technical support."

Local school districts will identify those families that live in serviceable areas but have not subscribed to internet. The districts will then work with local internet providers to provide those families with internet service to support remote learning solutions during the new school year.

ABOUT ATLANTIC BROADBAND

Atlantic Broadband, a subsidiary of Cogeco Communications Inc. (TSX: CCA), is the eighth-largest cable operator in the United States, based on the number of television service customers served. The company provides its residential and business customers with internet, TV and phone services in 11 states: Connecticut, Delaware, Florida, Maine, Maryland, New Hampshire, New York, Pennsylvania, South Carolina, Virginia and West Virginia. Atlantic Broadband is headquartered in Quincy, Massachusetts. To learn more about Atlantic Broadband, please visit <https://atlanticbb.com>.
